# CRRU Ireland Environmental Risk Assessment (ERA) Form

READ THE ADVISORY NOTES PROVIDED BEFORE YOU CARRY OUT THE ASSESSMENT

<b>Before the ERA</b>	Name of the site and Address:	[Tick here <input type="checkbox"/> or for electronic versions <b>Click Here</b> if address was previously entered]	
	Name of Client and/or Client's site representative:	[Tick here <input type="checkbox"/> or for electronic versions <b>Click Here</b> if name s was previously entered]	
	Contact No:	[Tick here <input type="checkbox"/> or for electronic versions <b>Click Here</b> if contact no was previously entered]	
	Name of Assessor:		
	Date of Assessment:		
<b>The Infestation</b>	Carry out a site survey and insert the document reference:	Document ref: .....	
	Were environmental risks noted during the survey? List all environmental risks noted:	Yes / No Risks noted .....	
	Is there current target rodent activity?	Rat: Yes / No	Mouse: Yes / No
	Is the rodent infestation situated only indoors and will baits only be placed indoors?	Yes / No	
	Is there a high potential for reinvasion?	Yes / No	
	In cases where there is a high potential for reinvasion, have other methods of control been proven to be insufficient?	Yes / No	
	Is the source and point of entry of target rodents, accessible to / or controlled by the site management?	Yes / No	
	Do you intend to use toxic bait on a long-term basis? If so, insert the justification document reference. Justifications must demonstrate no unacceptable risk for non-target species.	Yes / No Justification document ref: .....	
<b>Risk Hierarchy</b>	Why is it necessary to use a rodenticide at this site? Why can't the problem be resolved by other means, such as improving hygiene and preventing rodent ingress to sensitive areas or traps?		
	If you intend to use a SGAR and not a FGAR, explain why.		
	If you intend to use one of the more potent SGARs (bromadiolone, brodifacoum, difenacoum or flocoumafen), explain why.		
<b>Sensitive Areas</b>	Make a note if the site is entirely, or contains a part of a - <ul style="list-style-type: none"> <li>• <i>Site of Special Scientific Interest (SSSI),</i></li> <li>• <i>Special Area of Conservation (SAC),</i> or</li> <li>• <i>Special Protection Area (SPA)?</i></li> </ul>		

<b>Products</b>	Give the name of the rodenticide product, the active substance and the PCS or IE/BPA Number * for all products to be used.	
<b>The ERA #</b>	Provide a list of all environmental risks you perceive to be present at the site - <ul style="list-style-type: none"> <li>• What wildlife species are known to be on the site?</li> <li>• What wildlife species may be on the site?</li> <li>• Is there a water body on or adjacent to the site?</li> </ul>	
	Provide a list of all the measures you will use during rodenticide application at the site to reduce the risks you have identified:	
<b>Disposal of Rodent Carcasses</b>	How often will you search for rodent carcasses?	
	Will others on site also search for rodent carcasses? Who?	Yes / No If yes, list the persons concerned:
	What measures will you use to safely dispose of rodent carcasses?	
<b>Disposal of Spent Bait</b>	How will you dispose of spent bait?	
<b>Conclusions</b>	With due consideration to the information recorded above, can this treatment safely proceed without unacceptable damage to wildlife and the environment?	Yes / No

\* As shown on product labels

# If there is insufficient room in the boxes provided, use additional sheets and secure them to this sheet
